https://mareksax.github.io/portfolio/

Passionate Full-stack Developer with experience in developing modern web applications using **JavaScript, TypeScript, and React.js.** Skilled in creating efficient backend solutions with **Node.js, Express, and SQL databases.** Experienced in version control **(Git), cloud services (Azure),** and agile methodologies. Strong problem-solving skills, attention to detail, and a commitment to writing clean, maintainable code.

My journey as a developer is enriched by my background as a professional musician. Years of honing my craft have instilled in me a keen sense of creativity, attention to detail, and discipline - all of which translate into my development work. By bringing harmony, rhythm, and composition to my coding practice.

Experience

JUN '25 - PRESENT
Front-End Developer | DanCorp (contract)

- Built and maintained front-end applications for healthcare platforms using Next.js and TypeScript
- Collaborated with designers and backend teams to deliver accessible, responsive UIs for doctors and patients
- Implemented complex form handling and validation flows (React Hook Form, Zod) for sensitive medical data
- Optimized app performance and loading times via dynamic imports, image optimization and SSR/ISR strategies
- Ensured compliance with healthcare-related security and privacy standards (e.g. basic HIPAA-like practices)

MAR '25 - PRESENT
Full-Stack Developer | 4spacje.pl (part time)

- Maintained and enhanced a high-performance blog built with Next.js (App Router) and TypeScript.
- Integrated and managed content from multiple headless CMS platforms (Contentful & Strapi).
- Developed AI-powered article search with filtering, tagging, and semantic relevance.
- Optimized SEO and Core Web Vitals through structured data, dynamic metadata, and Open Graph automation.
- Collaborated with editors to streamline publishing workflows and improve content management UX.

MAY '24 - JUL '25
Full-Stack Developer | NGO - Fundacja Na Rzecz Pomocy Chorym Na Białaczki (volunteer)

- Led the development of a commercial web application for a charity run, from planning to production deployment.
- Served as the main point of contact with a third-party race timing provider, ensuring smooth API integration and data exchange.
- Facilitated collaboration between developers and non-technical stakeholders to align the product with event goals.
- Oversaw deployment processes, CI/CD workflows, and production stability during critical event windows.
- Worked in an **agile environment,** collaborating remotely with other developers and stakeholders.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulaion).

Projects

hematobieg.org
Full-stack Developer | React.js, TypeScript, Zustand, TanStach Query (React Query), Node.js, Express, MongoDB

- Commercial web app built for a **charity run event**, featuring race details, live photo gallery, participant registration, and results tracking.
- Developed the **React.js frontend** with modern state management via **Zustand** and asynchronous state handling using **TanStack Query (React Query)**.
- Integrated **secure online payments** for donation-based race entries, including complete frontend-to-backend flow, transaction validation, and user feedback mechanisms.
- Created a custom **Node.js + Express backend** with **MongoDB**, handling registration logic, payment processing, and real-time result updates.
- Designed the API architecture and ensured clean separation of concerns between services.
- Built a **two-way integration** with a third-party race timing provider. Handled pre-race participant data synchronization and automated retrieval of official results after the event.
- Optimized the performance and stability of the application.

erecepta.info.pl,
receptaonline.net
Front-end Developer | Next.js, TypeScript, React Hook Form, Framer Motion, Tailwind CSS

- Built and deployed a modern landing page from scratch based on a custom Figma design.
- Designed and implemented complex, validated forms using **React Hook Form** for a smooth user experience.
- Integrated **Framer Motion** for slick, responsive animations and micro-interactions.
- Developed a **fully responsive, mobile-first UI** that works across all modern devices (even your smart fridge).
- Connected seamlessly to the backend via **REST API**. Handled data flows and edge cases.
- Integrated **secure online payment system** for handling prescription orders (inc. error handling & UI feedback).
- Structured the codebase with **reusable components** for maintainability and scalability.

slimai.app
Full-stack Developer | Next.js, TypeScript, Tailwind CSS, Framer Motion, React Hook Form, Zod, Nodemailer

- Built and deployed a modern landing page from scratch based on a custom Figma design.
- Implemented a **fully responsive, mobile-first** layout with **Tailwind CSS**.
- Developed a contact form with **React Hook Form + Zod validation**, connected to a secure Node.js endpoint via **Nodemailer**.
- Added smooth animations and micro-interactions with **Framer Motion** to enhance user engagement.
- Structured the codebase with **reusable and scalable components**, ensuring maintainability.
- Delivered the project end-to-end as a **solo developer** (design → implementation → deployment).

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulaion).

Skills

- **Frontend:** JavaScript (ES6+), TypeScript, React.js, Hooks, React Router, Next.js, Redux, Zustand, Vue, HTML5, CSS3, Sass (SCSS), styled-components, BEM, Material-UI, TailwindCSS
- **Backend:** Node.js, Express.js, SQL (PostgreSQL), MongoDB, REST API
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Cloud & DevOps:** Basic knowledge of Cloud (Azure), CI/CD, Docker, IaC
- **Other**: Agile methodologies (Scrum/Kanban), Testing (Jest, React Testing Library), NPM, Webpack
- **Languages**: Polish (native), English (C1)

Education

JUN '23 - JUN '24
Full Stack Developer | Mate Academy

- Implementing React applications with reusable code using JSX, hooks, React-router, Redux, ClassNames and functional components.
- Creating pixel-perfect, responsive landing pages based on Figma using HTML, CSS, SASS.
- Used version control system (Git) to manage code and collaborate with other developers.
- Designing and developing servers and APIs with Node.js and Express. and designing SQL databases.

SEP '21 - SEP '23
Information Technology Technician | Cosinus

- Vocational diploma: 351203

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulaion).
